Reference: Letter of Reference
Nimesh Bhavsar, PE
OM Engineering Services, Inc.
621 E. Washington St, Suite 8
Orlando, FL 32801

To Whom It May Concern:

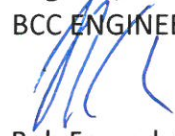

It is my pleasure to write this Letter of Reference for OM Engineering. As the Structures Manager for BCC Engineering's Fort Lauderdale office, I have had the opportunity to work with OM Engineering on several occasions over the course of the past several years. As a result, I can personally attest to OM Engineering's performance. OM Engineering demonstrated an exceptional level of technical expertise, commitment, and responsiveness – three areas I personally value most when it comes to completing a successful project.

Most recently, OM Engineering assisted BCC with two important Design-Build projects for FDOT District 4. Both projects required detailed inspections of concrete box culvert structures, and compilation of FDOT bridge inspection reports to support the culvert repair plans. All of these assignments were short-notice and during late stages of the project when schedule is particularly critical.

OM Engineering's team was led by Mr. Nimesh Bhavsar. Nimesh was our key point of contact. He scoped the work, quickly turned around the proposal, and completed the assignment on time and within budget. Moreover, when influences outside of the D-B Team's control surfaced, Nimesh adjusted his schedule and allocated resources to complete the assignments on schedule. When operating in the Design-Build arena, we hold our partners to the same high standards we hold ourselves, relying upon them to come through under any circumstance. Simply stated, OM Engineering delivers. That is primarily why we have continued to work with Nimesh and OM Engineering, and in fact as of this writing we are preparing to work together on yet another project. We look forward to the same results.

I hope this Letter of Reference has been helpful. If you require any additional information, please do not hesitate to contact me directly.

Regards,
BCC ENGINEERING, INC.
